DETAILED ACTION

Request for Continued Examination (RCE)

The RCE filed on February 19, 2008 has been processed. A non-final rejection follows.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

1-26 and 34-66 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-26, 34-61, and 65-66 are directed to a method. Based on Supreme Court precedent, a proper process must be tied to another statutory class or transform underlying subject matter to a different state or thing (*Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780,787-88 (1876)). Since neither of these requirements is met by the claim, the method is not considered a patent eligible process under 35 U.S.C. 101. To qualify as a statutory process, the claim should positively recite the other statutory class to which it is tied, for example by identifying the apparatus that accomplished the method steps or positively reciting the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

Claims 62-64 are non-statutory, because a signal is not statutory subject matter.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1- 26 and 34-66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Elibacher (6,724,887) in view of (Marshall).

Elibacher discloses the invention substantially as claimed, as set forth in the previous Office Action. Eilbacher does not disclose referring a communication to credit counseling agencies, a debtor, or a creditor. Marshall teaches a method and corresponding system directed to call centers involving credit counselors and creditors whereby consumers are directed to credit counselors (p.3, 3rd paragraph to p.4, 1st paragraph). It would have been obvious to one incorporate the call center involving credit counseling agencies, creditors, and debtors, into the invention disclosed by Eilbacher, as an alternative use of directing calls throughout the call center.

Response to Arguments

Applicant's arguments filed on February 19, 2008 have been fully considered but they are not persuasive. The Applicant argues that neither references discloses or teaches an outbound communication path. In response, Marshall teaches routing the communication to credit counselors (p.1-4). Therefore, the Examiner is interpreting the references are reading onto the invention substantially as claimed.
